

14. Search like a Pro-Google-2

Imagine being able to search in real time!

Realtime search tells you what's happening right now -what's happening near by!

Just goto google.com/trends and look at any of the topics under **Hot topics**

First one listed of course is 'ipad 3g' and you will get info as it comes from all over the world and from blogs like tweets etc

The message also informs you how many seconds, minutes, hours the news is old!

Another amazing tool to help in searches.

This makes you uptodate on real time basis.

Try it out.
